

:30 National SOS PSA -- HURRICANE

If you find yourself trapped during a hurricane without a working cell phone, you can still call for help. An FRS "Walkie Talkie" can be heard by rescuers in the area.

At the top of each hour, call on channel ONE for TWO minutes with any privacy codes turned off. Say your name, location, and emergency.

Then listen for THREE minutes. If you don't hear an answer, save your batteries by turning off your walkie-talkie and waiting until the next hour to call again.

It's as easy as 1... 2... 3.... Every hour call on channel ONE for TWO minutes and listen for THREE minutes.
